👤 PROFILE

After a long period of flirting with the humanities and the arts, I have discovered a passion that integrates very well with my personality: web development. Currently absorbing the entire spectrum, from design to architecture and implementation of systems. I'm especially in love with JavaScript and React, although I also have a good grasp of Python. I have completed various online programming certificates and recently finished a programming Bootcamp. Also, I am proactive and meticulous in everything I engage with. I work well in teams, am problem-solving oriented, and quickly learn what is necessary to be able to integrate myself into new projects.

I was also in charge of the local hit comedy "Me Cargan Los Optimistas" (2018-2019) that was seen by more than 20.000 spectators as general producer and composer.

★ PROJECTS

- Project Chilegigs
December 2020

In my last coding Bootcamp graduation project, I combined all my skills to produce a full-stack web app which is a DJ Booking website where Dj's expose their technical requirements and have negotiations with the client before the "gig" is set. Dj's and clients can also leave a feedback after the show has passed. To do this, I used React and Bootstrap for the Front End and Python-Flask at the Back End. It has a fully functional CMS platform created from scratch for the admin, that allows you to delete accounts, change elements of the home and supervise the overall traffic of the website. It also integrates a password recovery and user notification system with flask-mail + JWT token and uses more than 10 React Libraries.
